

Take control of your temperature measurements

INOR

Master Your Process with Smart Temperature Control

At INOR, we believe that precision in temperature measurement plays a vital role in building a more sustainable world. By optimizing processes, reducing emissions, and improving energy efficiency, we help industries achieve the **UN's Sustainable Development Goals (SDGs)**—specifically **Goal 7** (Affordable and Clean Energy), **Goal 9** (Industry, Innovation, and Infrastructure), and **Goal 13** (Climate Action). Every measurement helps to build a smarter, safer, more sustainable future.

THE GLOBAL GOALS

Smarter. Safer. More Sustainable.

INOR's versatile transmitter platform offers a selection of high-performance models, from reliable basics to advanced, certified solutions with ATEX, SIL2, HART, NFC, and Bluetooth®. Built on a proven platform and engineered for precision, each transmitter delivers long-term reliability and full digital integration. They're designed to optimize processes, reduce emissions, and improve energy efficiency, supporting your journey toward a smarter, responsible, future-proof industry. With precise temperature measurement and durable design, our products enable safer, more efficient production with a lower environmental impact.

Shaping a Sustainable Future – One Degree at a Time

At INOR, we see sustainability as a responsibility that is embedded into our daily operations, our R&D, and the way we support our customers. By supporting the **UN's Sustainable Development Goals (SDGs)**, we help our customers to contribute to a smarter, safer, and more responsible future.

Economic Sustainability

We support the development of a more resilient and sustainable industrial sector through innovation and high-precision measurement solutions. By optimizing processes and energy usage, our instruments help customers achieve greater efficiency and long-term cost savings. Our focus on quality and continuous improvement ensures long-term value, both for our partners and for the planet.

Social Sustainability

At INOR, sustainability also means caring for people. We are committed to maintaining a safe, inclusive, and healthy work environment where every employee is treated equally and given the opportunity to thrive. Our culture promotes well-being, diversity, and equal opportunities, core values that are vital to long-term success and societal progress.

Environmental Sustainability

INOR continuously strives to minimize its environmental footprint, because sustainability is more than a goal; it's a responsibility we act on every day.

We use green electricity and actively reduce our overall energy consumption. In our production, we phase out hazardous substances and transition from paper to digital documentation to reduce waste. Our products contribute to improved water management, more efficient energy use, and reduced environmental impact in industrial processes. We are proud to be ISO 14001 certified since 2002.

THE GLOBAL GOALS

The Global Goals that INOR is focusing on:

Economic

Social

Environmental
