Introduction of a temporary 3.5 % logistics and supply chain cost surcharge from 25 May 2026

Recent developments in the Middle East are currently leading to a significant increase in energy, supply chain and logistics costs. Similarly, the cost of individual components for our products is rising due to an anticipated shortage on the market.

To ensure transparency regarding the resulting additional costs, companies within WIKA group will have to apply a temporary “**logistics and supply chain cost**” surcharge of 3.5 % on all orders from 25 May 2026. In practical terms, this means:

- All orders placed on or after 25 May 2026 will include this surcharge (subject to any legal requirements and contractual agreements).
- The 3.5 % surcharge will be calculated based on the net price and will apply until further notice.

We can also confirm that, as things stand, there are currently no supply shortages affecting our products. To help us continue to deliver reliably even in a challenging logistics environment, please place your orders well in advance to allow us to plan accordingly.

Should you have any queries, your usual contact person will be happy to assist you at any time. Thank you very much for your understanding and for your continued trust in our partnership.

Malmö 11th of May 2026
