

Business case Australia

Partner	Temperature Controls, Australia
Customer	Manildra Group Shoalhaven Starches
Industry	Food and Industrial
Application	Ex d application within the factory
Used transmitter	IPAQ-C530

Description

This plant is the largest wheat starch and gluten plant of its kind in the world and operates in conjunction with an ethanol distillery, to extract value added products from 100 % of the wheat grain using advanced industry technology. Ethanol products include a range of grades for food and beverages, pharmaceuticals and personal care, industrial applications and transport fuels.

The starch product range has expanded to service the growing food, paper, packaging, mining and construction industries. These products include waxy maize starch and a range of wheat-based starches including resistant, modified food grade, as well as size press, wet end, corrugating and starches for carbonless paper and coating.
