

INOR has been acquired by the WIKA Group - a powerful combination that will strengthen their offerings within temperature measurement.

14th of May 2025
Malmö, Sweden

On the 12th of May 2025, The WIKA Group takes over the industrial temperature measurement company INOR Process AB. INOR will be fully transferred to WIKA Group and will continue to offer a premium temperature measurement portfolio, combining both the existing OPTITEMP temperature sensors, INOR temperature transmitters and the comprehensive WIKA portfolio. INOR will continue to manufacture temperature sensors and transmitters at its facilities in Malmö, Sweden.

Strengthening temperature offering

INOR's previous owner KROHNE and WIKA are entering a strategic partnership to strengthen their position in the temperature measurement section and, as a result, INOR Process AB will be transferred to WIKA. WIKA Group based the acquisition of INOR on the strategic decision for their targeted expansion of the product portfolio in the temperature technology sector, INORs innovative portfolio and its local presence in the Swedish market.

"Joining forces with WIKA Group marks an exciting new chapter for INOR Process AB. We are proud to become part of a world-leading company that shares our commitment to quality and innovation. This partnership will not only strengthen our capabilities but also open new opportunities to better serve our customers and grow our business both locally and globally. Together, we are stronger and better positioned for the future."

- Tobias Schulten, Managing Director, INOR Process AB

About INOR Process AB

INOR Process AB is a Swedish specialist in industrial temperature measurement with more than 85 years of experience in sensor technology and signal conditioning. Headquarters in Malmö with 60 employees and subsidiaries in Germany, INOR Transmitter GmbH and in Finland, INOR Transmitter Oy. INOR is known for pioneering innovations, including the world's first head-mounted temperature transmitter. The company develops and manufactures high-precision temperature sensors and transmitters for industrial applications, offering both standard and customized solutions. INOR serves customers globally through subsidiaries and partners and is recognized as a center of excellence for temperature measurement within its group. Since 2006, INOR has been part of KROHNE, a global leader in measurement technology.
